

GST MADE SIMPLE
QUESTIONS AND ANSWERS
GST 2202
PHILOSOPHY, LOGIC AND HUMAN EXISTENCE
BY
COMPILED BY Mr. DUNGUS FRANCIS

This compilation was prepared with a genuine commitment to assist students of the Federal University of Kashere, Gombe State, in developing a deeper and more meaningful understanding of the course Philosophy, Logic and Human Existence across all fields, faculties and Departments within the University. It is designed as a structured learning support to strengthen conceptual clarity, critical thinking, and academic engagement with the subject matter. Students are therefore encouraged to make effective use of it as a guide for improving academic performance and intellectual development, and not as a replacement for serious study, independent thinking, and consistent scholarly effort.

1. Philosophy is best described as:
 - A. A religious doctrine
 - B. A rational inquiry into reality
 - C. A political ideology
 - D. A mathematical science
2. Philosophy has:
 - A. One universal definition
 - B. No definition at all
 - C. A single agreed definition
 - D. Many definitions
3. According to Broad (1969), philosophy is:
 - A. What scientists do
 - B. What philosophers do
 - C. What teachers do
 - D. What students do
4. One major function of philosophy is:
 - A. Memorisation
 - B. World domination
 - C. Construction of world views
 - D. Physical training
5. World views in philosophy are mainly:
 - A. Random statements
 - B. Emotional reactions
 - C. General guides for understanding reality
 - D. Political laws
6. Philosophical statements are mainly products of:
 - A. Guesswork

- B. Reflection and speculation
 - C. Experiment alone
 - D. Tradition only
7. An example of a philosophical statement is:
- A. Water boils at 100°C
 - B. An unexamined life is not worth living
 - C. Nigeria is in Africa
 - D. $2 + 2 = 4$
8. Philosophy helps human beings mainly to:
- A. Avoid thinking
 - B. Understand and cope with life challenges
 - C. Memorise facts
 - D. Win competitions
9. Philosophy is also described as the pursuit of:
- A. Wealth
 - B. Power
 - C. Wisdom
 - D. Entertainment
10. Critical thinking in philosophy means:
- A. Accepting all beliefs
 - B. Rejecting all beliefs
 - C. Examining beliefs before accepting them
 - D. Ignoring opinions
11. Philosophy does NOT take beliefs for:
- A. Granted
 - B. Examined
 - C. Questioned
 - D. Analysed
12. According to Staniland H. S., philosophy is:
- A. Worship of ideas
 - B. Criticism of the ideas we live by
 - C. Study of numbers
 - D. Study of plants
13. Kwasi Wiredu stated that philosophy examines:
- A. Food systems
 - B. Intellectual foundations of life
 - C. Weather conditions
 - D. Trade routes
14. Philosophy contributes to other disciplines by:
- A. Replacing them
 - B. Ignoring them
 - C. Examining their foundations
 - D. Destroying them
15. Philosophy of science is an example of:
- A. Mathematics
 - B. A branch of philosophy

- C. A physical science
 - D. A language course
16. Thinking and reasoning are:
- A. Always the same
 - B. Not always the same
 - C. Completely unrelated
 - D. Always perfect
17. The skill of reasoning can be improved through:
- A. Luck only
 - B. Experience and instruction
 - C. Isolation
 - D. Ignorance
18. The purpose of GST2202 is to provide:
- A. Physical training
 - B. Intellectual tools for reasoning
 - C. Financial skills
 - D. Religious instruction
19. A person unable to assess claims properly may:
- A. Always be correct
 - B. Believe anything
 - C. Never think
 - D. Avoid learning
20. Philosophical activity mainly involves:
- A. Memorising facts
 - B. Forming, analysing, and criticising ideas
 - C. Copying opinions
 - D. Avoiding reflection
21. Philosophy is traditionally divided into how many main branches?
- A. Two
 - B. Three
 - C. Four
 - D. Five
22. The term “metaphysics” was coined by:
- A. Plato
 - B. Aristotle
 - C. Andronicus of Rhodes
 - D. Socrates
23. Metaphysics literally means:
- A. Study of knowledge
 - B. Beyond the physical
 - C. Study of ethics
 - D. Study of logic
24. Epistemology is derived from two Greek words meaning:
- A. Being and reality
 - B. Knowledge and theory

- C. Truth and belief
- D. Mind and matter
- 25. Epistemology is best described as the theory of:
 - A. Beauty
 - B. Knowledge
 - C. Reality
 - D. Morality
- 26. Axiology is mainly concerned with:
 - A. Knowledge
 - B. Reality
 - C. Beauty and values
 - D. Reasoning
- 27. Ethics is also known as:
 - A. Moral philosophy
 - B. Natural philosophy
 - C. Political philosophy
 - D. Scientific philosophy
- 28. Logic is primarily concerned with:
 - A. Human emotions
 - B. Correct and incorrect reasoning
 - C. Physical reality
 - D. Moral actions
- 29. Ontology studies:
 - A. The universe only
 - B. Human nature only
 - C. Knowledge systems
 - D. Logic principles
- 30. Cosmology studies:
 - A. Human mind
 - B. Universe
 - C. Moral behaviour
 - D. Language
- 31. Idealism holds that reality is:
 - A. Purely material
 - B. Mental or immaterial
 - C. Non-existent
 - D. Scientific only
- 32. Materialism reduces reality to:
 - A. Mind
 - B. Spirit
 - C. Matter
 - D. Ideas
- 33. The Latin phrase “esse est percipi” means:
 - A. To think is to exist
 - B. To be is to be perceived

- C. To know is to doubt
 - D. To act is to be
34. Which philosopher is associated with idealism?
- A. Democritus
 - B. George Berkeley
 - C. John Dewey
 - D. Gilbert Ryle
35. Scepticism argues that:
- A. Knowledge is certain
 - B. Knowledge is impossible to obtain with certainty
 - C. All knowledge is scientific
 - D. Truth is absolute
36. Relativism claims that truth is:
- A. Universal
 - B. Absolute
 - C. Dependent on perspective
 - D. Fixed and permanent
37. Normative ethics deals with:
- A. Meaning of moral language
 - B. Moral judgement of actions
 - C. Universe structure
 - D. Logical reasoning
38. Meta-ethics focuses on:
- A. Physical laws
 - B. Meaning of moral terms
 - C. Human anatomy
 - D. Political systems
39. Logic is described by Aristotle as:
- A. Thinking on thinking
 - B. Science of matter
 - C. Study of society
 - D. Study of beauty
40. One value of logic is that it helps people to:
- A. Avoid reasoning completely
 - B. Accept all opinions
 - C. Analyse arguments critically
 - D. Increase emotional thinking
41. A logic-informed person is least likely to be influenced by _____.
A. Teachers
B. Political demagogues or advertisers
C. Scientists
D. Judges
42. According to the text, training in logic helps us to provide _____ for our claims.
A. Stories
B. Opinions

- C. Good reasons as evidence
 - D. Emotions
43. Logic is most appreciated in _____.
A. Market place
B. Court of law
C. Religious centers
D. Sports arena
44. Blaise Pascal stated that all our dignity lies in _____.
A. Wealth
B. Power
C. Thought
D. Knowledge
45. How many major types of logic are identified in the text?
A. One
B. Two
C. Three
D. Four
46. Formal logic is also known as _____ logic.
A. Symbolic
B. Traditional
C. Mathematical
D. Modern
47. Symbolic logic is also called _____ logic.
A. Moral
B. Mathematical
C. Political
D. Emotional
48. Symbolic logic uses _____ to express arguments clearly.
A. Words only
B. Stories
C. Symbols
D. Images
49. Symbolic logic is mainly concerned with _____ relations.
A. Emotional
B. Semantic
C. Syntactical
D. Physical
50. One importance of symbolic logic is that it reduces _____.
A. Knowledge
B. Ambiguity
C. Learning
D. Arguments
51. Symbolic logic helps to avoid _____ in ordinary language.
A. Clarity
B. Vagueness

- C. Evidence
 - D. Logic
52. The symbol ($\sim$) represents _____.
A. Conjunction
B. Negation
C. Disjunction
D. Conditional
53. The statement “Ade is not a student” is represented as _____.
A. P
B. $\sim P$
C. $P \cdot Q$
D. $P \supset Q$
54. The symbol ($\cdot$) stands for _____.
A. Or
B. And
C. Not
D. If
55. A conjunction is true only when _____.
A. One statement is false
B. Both statements are true
C. Both are false
D. One is unknown
56. The symbol for disjunction is _____.
A. $\cdot$
B. $\sim$
C. $\vee$
D. $\equiv$
57. Disjunction is commonly expressed as _____.
A. And
B. Not
C. Either...or
D. If and only if
58. There are _____ types of disjunction.
A. One
B. Two
C. Three
D. Four
59. Inclusive disjunction is false only when _____.
A. One statement is true
B. Both statements are true
C. Both statements are false
D. One is false
60. Symbolic logic allows us to determine validity of arguments without _____.
A. Evidence
B. Natural language ambiguity

- C. Symbols
- D. Statements

61. The conditional statement is symbolized by which sign?
- A. $\equiv$
 - B. $\supset$
 - C. $\cdot$
 - D. $\vee$
62. A conditional statement is false only when:
- A. Both antecedent and consequent are true
 - B. Antecedent is false and consequent is true
 - C. Antecedent is true and consequent is false
 - D. Both antecedent and consequent are false
63. The antecedent in a conditional statement is the:
- A. Statement that follows
 - B. Statement that precedes
 - C. Conclusion
 - D. Negation
64. A biconditional is also known as:
- A. Contradiction
 - B. Material equivalence
 - C. Disjunction
 - D. Conjunction
65. The symbol for biconditional is:
- A. $\supset$
 - B. $\cdot$
 - C. $\equiv$
 - D. $\vee$
66. A biconditional is true when:
- A. One statement is true
 - B. Both statements differ in truth value
 - C. Both statements have same truth value
 - D. Both are false only
67. The law of identity states that:
- A. $p \neq p$
 - B. $p \supset \sim p$
 - C. $A = A$
 - D. $p \vee q$
68. The law of non-contradiction states that:
- A. A thing can be and not be
 - B. A thing cannot both be and not be
 - C. Everything is false
 - D. Everything is true
69. The principle of excluded middle states that:
- A. p is always false
 - B. p is both true and false

- C. p is either true or false
 - D. p is neither true nor false
70. In logic, inference means:
- A. Random guessing
 - B. Moving from known to unknown
 - C. Ignoring evidence
 - D. Repeating statements
71. The two main types of inference are:
- A. Simple and complex
 - B. True and false
 - C. Deductive and inductive
 - D. Valid and invalid
72. Modus Ponens concludes:
- A. $\sim p$
 - B. q
 - C. p
 - D. $p \vee q$
73. Modus Tollens involves:
- A. Affirming antecedent
 - B. Denying consequent
 - C. Adding propositions
 - D. Ignoring premises
74. Disjunctive syllogism works with:
- A. Conjunction
 - B. Negation of one option in a disjunction
 - C. Biconditional only
 - D. Identity only
75. The symbol for conjunction is:
- A. $\vee$
 - B. $\cdot$
 - C. $\equiv$
 - D. $\supset$
76. Addition rule allows us to:
- A. Remove a proposition
 - B. Conclude a conjunction
 - C. Form a disjunction from a single proposition
 - D. Deny a proposition
77. Simplification allows us to:
- A. Combine statements
 - B. Conclude one part of a conjunction
 - C. Form biconditionals
 - D. Negate statements
78. Validity of an argument depends on:
- A. Truth of conclusion only
 - B. Truth of premises only

- C. Logical structure
 - D. Length of argument
79. An argument is invalid when:
- A. It has true premises and true conclusion
 - B. It has false premises only
 - C. It has true premises and false conclusion
 - D. It has no conclusion
80. Inductive arguments are concerned with:
- A. Validity only
 - B. Formal structure only
 - C. Strength of inference
 - D. Symbolic notation only
81. An argument is said to be sound when it is:
- A. Invalid with false premises
 - B. Valid and all premises are true
 - C. Inductive and weak
 - D. Based on opinion
82. Soundness of an argument excludes:
- A. Valid arguments only
 - B. Arguments with true premises and false conclusion
 - C. Invalid arguments with no conclusion
 - D. Simple propositions
83. Validity refers to:
- A. Truth of premises only
 - B. Truth of conclusion only
 - C. Logical relationship between premises and conclusion
 - D. Length of argument
84. A proposition is:
- A. A question
 - B. A command
 - C. A declarative sentence that can be true or false
 - D. A feeling
85. Which of the following is a proposition?
- A. Close the window
 - B. What time is it?
 - C. A week has seven days
 - D. Wow!
86. A non-proposition includes:
- A. Declarative statements
 - B. Questions and commands
 - C. True statements
 - D. False statements
87. A premise is:
- A. A final claim
 - B. A supporting statement

- C. A question
 - D. A punctuation mark
88. The conclusion of an argument is:
- A. A supporting reason
 - B. A claim supported by premises
 - C. A connective word
 - D. A question
89. Deductive arguments are those in which premises:
- A. Make conclusion probable
 - B. Necessitate the conclusion
 - C. Are irrelevant
 - D. Are always false
90. Inductive arguments:
- A. Guarantee conclusions
 - B. Provide probability
 - C. Are always valid
 - D. Do not use evidence
91. In inductive reasoning, the conclusion is:
- A. Certain
 - B. Probable
 - C. Impossible
 - D. Contradictory
92. "All men are mortal; Jonathan is a man; therefore Jonathan is mortal" is:
- A. Inductive
 - B. Deductive
 - C. Invalid
 - D. Emotional
93. A valid argument can have:
- A. Only true premises and false conclusion
 - B. True or false premises but cannot have true premises and false conclusion
 - C. No conclusion
 - D. No premises
94. The only impossible case for validity is:
- A. True premises and true conclusion
 - B. False premises and false conclusion
 - C. True premises and false conclusion
 - D. False premises and true conclusion
95. Sound arguments are:
- A. Invalid arguments
 - B. Valid arguments with true premises
 - C. Inductive arguments
 - D. Opinions
96. A simple proposition contains:
- A. Two independent clauses
 - B. One independent clause

- C. Many sentences
 - D. No meaning
97. Logical constants are also called:
- A. Subjects
 - B. Connectives
 - C. Verbs
 - D. Objects
98. Parentheses in logic are used to:
- A. Create confusion
 - B. Remove ambiguity
 - C. Replace words
 - D. Form sentences
99. The expression $(R \cdot W \vee C)$ without punctuation is:
- A. Clear
 - B. Ambiguous
 - C. Always true
 - D. A command
100. " $R \cdot (W \vee C)$ " means:
- A. R and either W or C
 - B. Either R and W or C
 - C. R or W and C
 - D. None
101. " $(R \cdot W) \vee C$ " means:
- A. R and (W or C)
 - B. Either R and W, or C
 - C. R only
 - D. W only
102. An argument is:
- A. A dispute
 - B. A set of propositions supporting a claim
 - C. A question
 - D. A command
103. A bad argument is:
- A. Not an argument
 - B. Still an argument
 - C. Always valid
 - D. Always sound
104. Indicating words help identify:
- A. Grammar rules
 - B. Premises and conclusions
 - C. Numbers
 - D. Names
105. Validity depends on:
- A. Truth of premises
 - B. Logical form

- C. Length of argument
 - D. Emotion
106. Inductive arguments deal with:
- A. Certainty
 - B. Probability
 - C. Commands
 - D. Definitions
107. A proposition must be:
- A. Declarative and truth-apt
 - B. A command
 - C. A question
 - D. A feeling
108. “She’s armed, so she’s dangerous” is:
- A. Not an argument
 - B. An argument with premise and conclusion
 - C. A question
 - D. A command
109. Analysis of arguments involves:
- A. Ignoring conclusions
 - B. Identifying premises and conclusions
 - C. Changing meanings randomly
 - D. Removing logic
110. A sound argument must be:
- A. Invalid and false
 - B. Valid with true premises
 - C. Inductive and weak
 - D. Opinion-based
111. The word “discourse” originates from which Latin term meaning “to run off in different directions”?
- A. Disciplina
 - B. Discurrere
 - C. Disputare
 - D. Dictum
112. Discourse can best be defined in linguistics as:
- A. Random speech
 - B. Speech pattern and language use in a community
 - C. Written grammar rules only
 - D. Mathematical reasoning
113. According to Oxford Advanced Learners Dictionary, discourse is:
- A. A short statement
 - B. A long and serious treatment of a subject
 - C. Casual conversation
 - D. A poem
114. Which of the following is NOT a type of discourse?
- A. Argumentation
 - B. Narration

- C. Computation
 - D. Exposition
115. Argumentation primarily aims to:
- A. Entertain
 - B. Convince using logic
 - C. Describe objects
 - D. Tell stories
116. Narration mainly focuses on:
- A. Giving instructions
 - B. Telling a story
 - C. Logical proofs
 - D. Scientific analysis
117. Description relies mainly on:
- A. Numbers and formulas
 - B. Human senses
 - C. Historical facts only
 - D. Debate skills
118. Exposition is designed to:
- A. Inform
 - B. Persuade emotionally
 - C. Entertain
 - D. Confuse
119. Which of the following is NOT a tool of exposition?
- A. Definition
 - B. Cause and effect
 - C. Compare and contrast
 - D. Emotional manipulation
120. Speech act theory focuses on:
- A. Grammar rules only
 - B. Words as actions
 - C. Poetry writing
 - D. Sentence length
121. A discourse community is:
- A. A group of politicians
 - B. People sharing similar ideas and language use
 - C. A school classroom only
 - D. A religious sect only
122. Syllogism was developed by:
- A. Plato
 - B. Socrates
 - C. Aristotle
 - D. Copi
123. A syllogism consists of:
- A. Four statements
 - B. Three statements

- C. Five statements
 - D. Two statements
124. The last part of a syllogism is called:
- A. Premise
 - B. Conclusion
 - C. Hypothesis
 - D. Argument
125. The major, minor, and middle terms belong to:
- A. Fallacies
 - B. Discourse
 - C. Categorical syllogism
 - D. Narration
126. The arrangement of a syllogism depends on:
- A. Mood and figure
 - B. Tone and style
 - C. Grammar and spelling
 - D. Emotion and logic
127. The major premise is usually written:
- A. Last
 - B. Second
 - C. First
 - D. Randomly
128. Logic is primarily concerned with:
- A. Emotions
 - B. Arguments
 - C. Stories
 - D. Opinions only
129. Conclusion indicators include:
- A. Because, since
 - B. Therefore, thus
 - C. For, as
 - D. If, when
130. Premise indicators include:
- A. Hence, thus
 - B. Therefore, so
 - C. Because, since
 - D. Consequently, finally
131. A valid argument means:
- A. Premises are false
 - B. Conclusion follows necessarily from premises
 - C. Argument is emotional
 - D. Argument is long
132. A fallacy is:
- A. A true argument
 - B. A reasoning error

- C. A grammar rule
 - D. A type of narration
133. Fallacies are mainly classified into:
- A. Formal and informal
 - B. Simple and complex
 - C. Written and oral
 - D. True and false
134. Formal fallacies are also called:
- A. Ad hominem
 - B. Non sequitur
 - C. Argumentum
 - D. Exposition
135. Affirming the consequent is an example of:
- A. Informal fallacy
 - B. Formal fallacy
 - C. Narrative error
 - D. Exposition error
136. Denying the antecedent is a violation of:
- A. Grammar rules
 - B. Rules of inference
 - C. Storytelling rules
 - D. Writing style
137. Appeal to force is also called:
- A. Argumentum ad baculum
 - B. Argumentum ad populum
 - C. Argumentum ad hominem
 - D. Argumentum ad veracundiam
138. Appeal to pity is known as:
- A. Ad populum
 - B. Ad misericordiam
 - C. Ad baculum
 - D. Ad ignorantiam
139. Hasty generalisation involves:
- A. Too much evidence
 - B. Small or unrepresentative sample
 - C. Logical proof
 - D. Strong conclusion
140. Begging the question means:
- A. Using the conclusion as a premise
 - B. Asking too many questions
 - C. Giving evidence
 - D. Using narration in logic

ANSWERS

1. B – Rational inquiry into reality
2. D – Many definitions
3. B – What philosophers do
4. C – Construction of world views
5. C – General guides for understanding reality
6. B – Reflection and speculation
7. B – An unexamined life is not worth living
8. B – Understand and cope with life challenges
9. C – Wisdom
10. C – Examining beliefs before accepting them
11. A – Granted
12. B – Criticism of the ideas we live by
13. B – Intellectual foundations of life
14. C – Examining their foundations
15. B – A branch of philosophy
16. B – Not always the same
17. B – Experience and instruction
18. B – Intellectual tools for reasoning
19. B – Believe anything
20. B – Forming, analysing, and criticising ideas
21. C. Four
22. C. Andronicus of Rhodes
23. B. Beyond the physical
24. B. Knowledge and theory
25. B. Knowledge
26. C. Beauty and values
27. A. Moral philosophy
28. B. Correct and incorrect reasoning
29. B. Human nature only
30. B. Universe
31. B. Mental or immaterial
32. C. Matter
33. B. To be is to be perceived
34. B. George Berkeley
35. B. Knowledge is impossible to obtain with certainty
36. C. Dependent on perspective
37. B. Moral judgement of actions
38. B. Meaning of moral terms

39. A. Thinking on thinking
40. C. Analyse arguments critically
41. B — Political demagogues or advertisers
42. C — Good reasons as evidence
43. B — Court of law
44. C — Thought
45. B — Two
46. B — Traditional logic
47. B — Mathematical logic
48. C — Symbols
49. C — Syntactical relations
50. B — Ambiguity
51. B — Vagueness
52. B — Negation
53. B — $\sim P$ (Not P)
54. B — And (Conjunction)
55. B — Both statements are true
56. C — $\vee$ (Vel / Disjunction)
57. C — Either...or
58. B — Two types
59. C — Both statements are false
60. B — Natural language ambiguity
61. B — Horseshoes
62. C — Antecedent is true and consequent is false
63. B — Statement that precedes
64. B — Material equivalence
65. C — $\equiv$ (Three-bar symbol)
66. C — Both statements have same truth value
67. C — A is A (Identity)
68. B — A thing cannot both be and not be
69. C — Either true or false (No middle course)
70. B — Moving from known to unknown
71. C — Deductive and Inductive
72. B — q (Consequent)
73. B — Denying consequent
74. B — Negation of one option in a disjunction
75. B — Dot ($\cdot$)
76. C — Form a disjunction from a single proposition
77. B — Conclude one part of a conjunction
78. C — Logical structure
79. C — True premises and false conclusion
80. C — Strength of inference
81. B — Valid and all premises are true
82. B — Arguments with true premises and false conclusion
83. C — Logical relationship between premises and conclusion
84. C — A declarative sentence that can be true or false

85. C — A week has seven days
86. B — Questions and commands
87. B — A supporting statement
88. B — A claim supported by premises
89. B — Necessitate the conclusion
90. B — Provide probability
91. B — Probable
92. B — Deductive
93. B — True or false premises but not true premises with false conclusion
94. C — True premises and false conclusion
95. B — Valid arguments with true premises
96. B — One independent clause
97. B — Connectives
98. B — Remove ambiguity
99. B — Ambiguous
100. A — R and either W or C
101. B — Either both R and W or C
102. B — A set of propositions supporting a claim
103. B — Still an argument
104. B — Premises and conclusions
105. B — Logical form
106. B — Probability
107. A — Declarative and truth-apt
108. B — An argument with premise and conclusion
109. B — Identifying premises and conclusions
110. B — Valid with true premises
111. B – Discurrere
112. B – Speech pattern and language use in a community
113. B – A long and serious treatment of a subject
114. C – Computation
115. B – Convince using logic
116. B – Telling a story
117. B – Human senses
118. A – Inform
119. D – Emotional manipulation
120. B – Words as actions
121. B – People sharing similar ideas and language use
122. C – Aristotle
123. B – Three statements
124. B – Conclusion
125. C – Categorical syllogism
126. A – Mood and figure
127. C – First
128. B – Arguments
129. B – Therefore, thus
130. C – Because, since

- 131. B – Conclusion follows necessarily from premises
- 132. B – A reasoning error
- 133. A – Formal and informal
- 134. B – Non sequitur
- 135. B – Formal fallacy
- 136. B – Rules of inference
- 137. A – Argumentum ad baculum
- 138. B – Ad misericordiam
- 139. B – Small or unrepresentative sample
- 140. A – Using the conclusion as a premise

GOOD LUCK
